

IMPORTING AND REPLACING A LOGO IN CHROME SECRET MODE TAB

How to check the imported data with Ctrl+Shift+N

(Chrome secret mode : The user can see the new updated version without cache)

Here we will learn how to change a logo in a secret mode tab. It has been recommend using logos from mass media or affiliate companies like Tesla. It's important to keep login details safe. AdWords can be connected with a UK or South Korean phone number.

Step by step instructions:

1. Import Completion:

- After importing is complete, press control + shift + n to create a new tab in secret mode.

2. Logo Replacement:

- Replace the logo in the new tab.
- Verify that the replacement is successful.

3. Logo Options:

- Consider using logos from mass media (e.g., Mass Media PR) or affiliate companies like Tesla.

4. Credential Security:

- Ensure the safety of your credentials.
- Hide your photo ID and password.

5. **Integration with AdWords:**

- Integrate AdWords.
- Use a UK or South Korean phone number.
